

Promotional offer

FLIR B660:

A thermal imaging camera designed for the expert.

The FLIR B660 thermal imaging camera is the perfect instrument for users who know the advantages that thermal imaging has to offer, and who rely on an infrared camera at work. Whether you are an infrared consultant or a building professional, the FLIR B660 thermal imaging camera will help you trace anomalies invisible to the human eye.

The FLIR B660 offers a superior image quality, the highest sensitivity and accuracy as well as the widest array of possibilities available. All tailor made to fulfill the demand of the expert depending on an accurate and full featured instrument to perform the work.

If more than 1 extra lens is ordered, the discount will apply to the most expensive lens.

Available lenses:

Reporting Software

Turning tools into solutions

At FLIR Systems, we recognize that our job is to go beyond just producing the best possible thermal imaging camera systems. We are committed to enabling all users of our thermal imaging camera systems to work more efficiently and productively by providing them with the most professional camera-software combination.

All software allows fast, detailed and accurate analysis and evaluation of thermal inspections.

FLIR Tools+

Groundbreaking IR Reporting Software

Showing those who need to know the hidden problems that you've found with your FLIR thermal imager is just as important as uncovering them in the first place. And FLIR Tools+ is the powerful, software solution to help you present those findings to decision makers most effectively.

With the first IR software for Mac OS, FLIR Tools+ now gives both PC and Mac users the tools to quickly import, edit and analyze images, and turn them into convincing, professional PDF inspection reports, ready to print or email so you can get the "yes for repairs" fast.

Key features:

- Import, search, filter, and view FLIR JPEG images directly from your FLIR handheld camera via USB cable or by downloading from the imager's SD card
- Edit radiometric images to thermal tune level and span, change the palette, or adjust parameters such as emissivity, reflective temperature, and more
- Add measurement tools – spots, area boxes, circles, lines, Delta T
- Add text annotations and edit image descriptions
- Create professional PDF image sheets and reports
- Add headers, footers, and logos
- Create, import, edit and export templates
- Choose a report format: horizontal IR + DC or vertical IR + DC
- Edit MSX images and "Sketch on IR/Visual" images
- Display stored compass and GPS information
- Perform updates on E-Series and T-Series cameras (FLIR Tools+ for PC only)
- Stream live video via USB cable from select camera models (FLIR Tools+ for PC only)
- Playback stored MP4 video imported from the camera (FLIR Tools+ for Mac OS only)
- Switch between IR, DC, Thermal Fusion, PiP, and MSX modes (FLIR Tools+ for Mac OS only)
- Re-open saved PDFs for further editing and revisions (FLIR Tools+ for Mac OS only)
- Export reports to print or email for easy sharing
- Radiometric sequence recording
- Playback of recordings
- Create a panorama image
- Advanced reporting

FLIR Tools+ allows you to edit radiometric images. You can also add advanced measurement tools like spots, area boxes, circles, lines and Delta T.

With FLIR Tools+ you can adjust your images by changing the pallet and adjusting parameters such as emissivity, reflective temperature and more.

Image descriptions and text and voice comments can be added to create compelling, easy-to-interpret reports.
